The S.A.F.E. Syringe Kit™

The S.A.F.E. Syringe Kit (**S**mart **A**ccident prevention, **F**ast & **E**asy) incorporates a staked needle syringe, drug, and diluent in a tube-shaped container. Injection preparation can easily be started by pushing down on the top of the container. Because all preparation work is done inside of a closed system, it can significantly reduce the risk of accidental needlesticks and exposure to harmful medications.

Press Coverage Articles about the S.A.F.E.™ Syringe Kit have been published in the Nihon Keizai Shimbun (Japanese) (6/20), the Nikkan Kogyo Shimbun (Japanese) (6/20), and the Yakuji Nippo (Japanese) (6/21).

Smart

Designed with healthcare workers in mind to be safer, faster, and easier to use.

Accident prevention

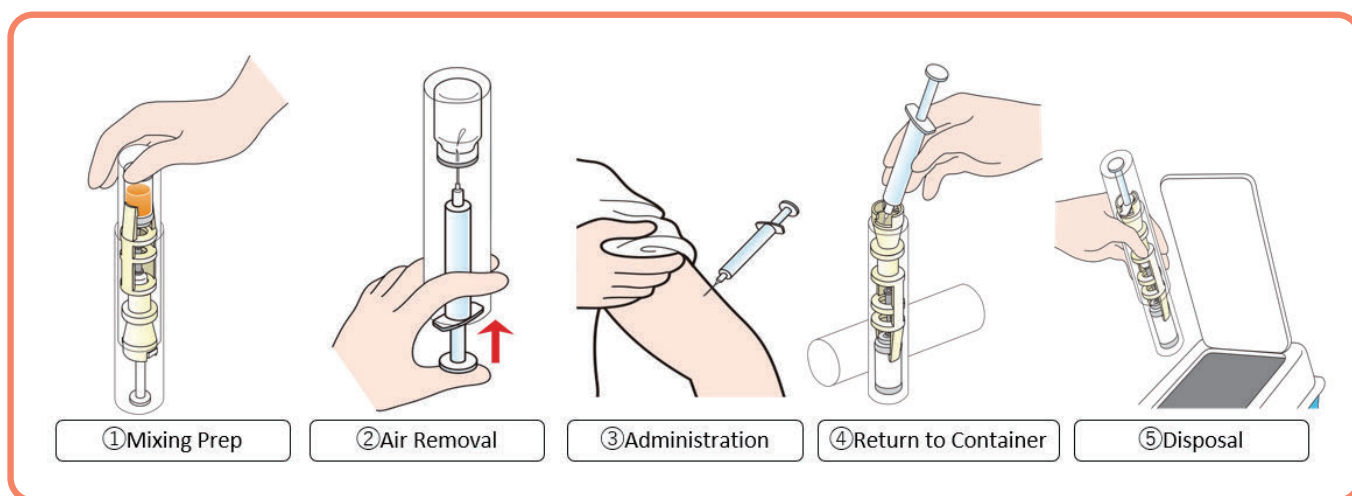

Because preparation is performed inside of the kit, preparation is done safely and with peace of mind without the risk of needlesticks and exposure to harmful medications.

Fast

Quick zero-loss prep without any complicated steps, saving time.

Easy

Compact design makes it easy to administer and lessens patient needle phobia. Easy disposal; no worries about various waste cluttering the workspace.

① Mixing Prep

② Air Removal

③ Administration

④ Return to Container

⑤ Disposal
