- Can also be used for intraoral imaging.
- Consistent shape and weight. Stable physical properties.
- Doesn't separate. Prevents aspiration.

Intraoral image

Medical products

For rapid delivery of suspensions

QUICK BAG

Solves the common problems with gavage administration!

- Allows use of medication that doesn't work with simple suspensions.
- Ensure that medication is delivered within 10 minutes.
- Single use. Safe & Hygienic.
- Visually check and feel that all medicine is crushed.
- Safer handling of anti-cancer drugs.

Medical products

Novel Tablet Packaging

ESOP

Next generation tablet packaging innovation!

- Simple, convenient.
- Safe. Prevents accidental ingestion.
- Medication identification made easy.
- Large display space.
- Folding design. Compact.

Formulation machines

Automation for new drug research research, clinical development, and even production!
Greatly reduce time and workload!

- In-line screw type tablet transport system.
- M Auger filling/weighing machine.
- Liquid capsule filling machine.

Greetings from the President

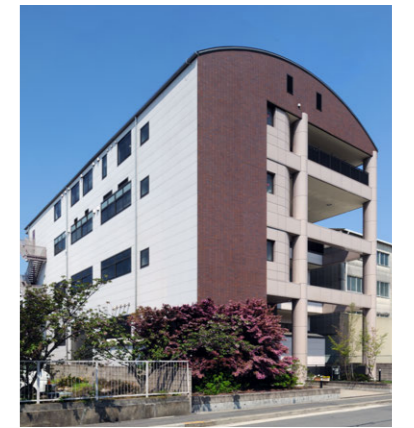

MORIMOTO-PHARMA CO., LTD.
PRESIDENT SHUJI MORIMOTO

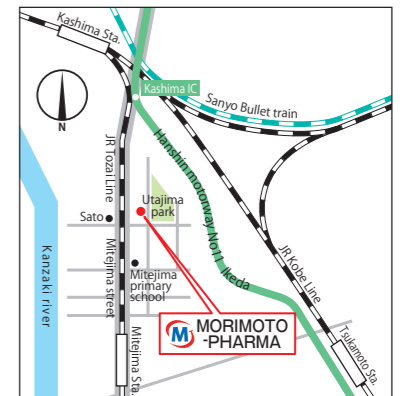

Today, excellent medicines are widely available for use at both medical institutions and home. However, due to various issues with taking or administration of medicine, the full benefits are not being realized. For example, some people have the inability to swallow properly, while others may not take all of their medication due to an unpleasant taste. In order to make taking medicine easier and happier, we developed the innovative support jelly NOMERUMON, which has wonderful properties that allow it to fully coat tablets and pills. Additionally, there are many difficulties associated with administration of medication via gavage. Crushing the medicine adequately, and delivering the suspension within 10 minutes can be challenging. In order to remedy this problem, QUICK BAG was developed for fast gavage preparation and delivery. Lastly, to prevent accidental ingestion of packaging, drug mistakes and leftover medicine, the new novel soft packaging "ESOP" was created. We are constantly innovating to improve the safety and administration of medication for both patients and healthcare professionals.

Corporate Profile

Head Office • Factory • Laboratory	5-8-28 Mitejima, Nishi-yodogawa-ku, Osaka 555-0012, Japan TEL.+81-6-6476-5572 FAX.+81-6-6476-5573
